# SMARTBEAR
Collaborator

Drive collaboration with peer code and document reviews you can trust

Catch weak code early. Build strong teams fast.

Prevent Defects

Mark defects on proposed code and document files to ensure that issues get fixed early in development. Collaborator serves as a quality gate so that only quality code enters your codebase.

Create Monitors
Without Jumping Through Hoops

Create a peer review process that works for you. Template-driven reviews in Collaborator make it easy to populate checklists, rules, and participants so your team can focus on what matters.

Measure Code Quality

Automatically capture metrics on your team's code and document reviews. Custom reports make it easy to ace audits and identify areas in your development that need extra attention.

Accelerate development timelines with ease

Collaborator helps our software team hit its milestones and complete our regulatory submissions when required. We also benefit from a 70% reduction in our code review and test review timeline.

– Aaron Peterson, Vice President of Research and Development at Heart Test Laboratories

Integrations
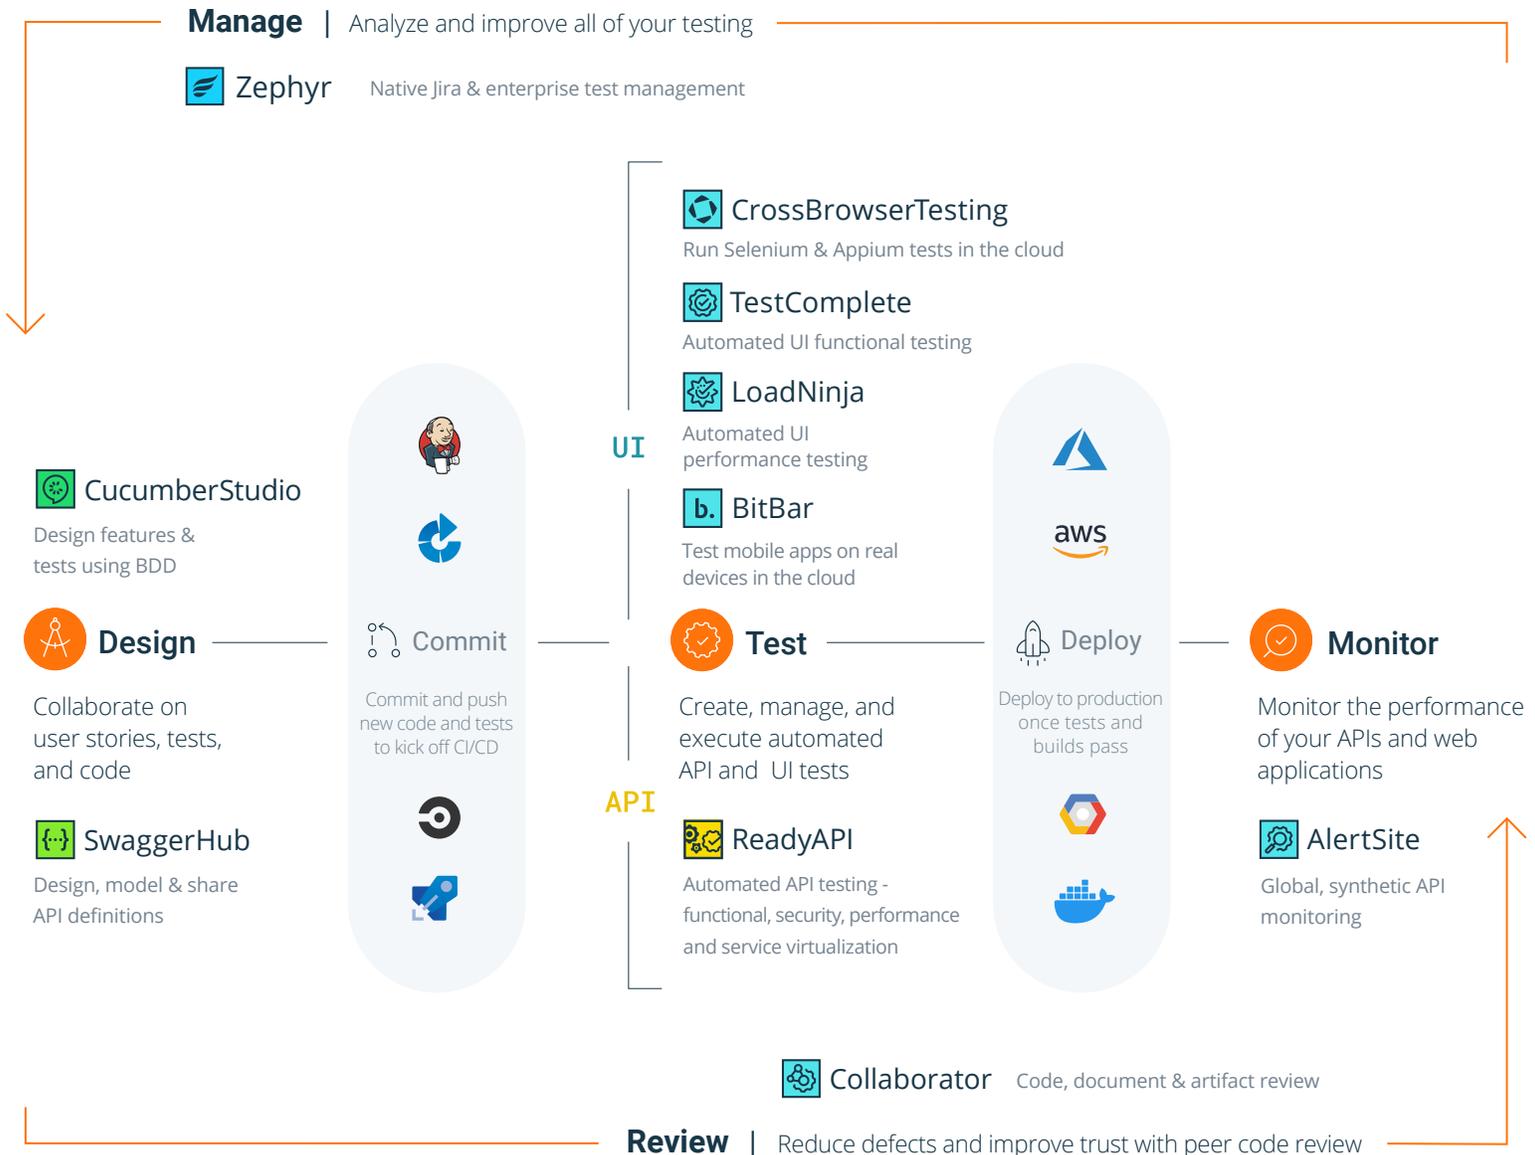

GitHub   Office   Jira Software

Visual Studio   Bitbucket

Industry Leaders Trust Collaborator

salesforce   Honeywell

Software Development Lifecycle with SmartBear

Agile and DevOps have transformed the rate of software development. To keep up, teams must work and communicate in new ways – which is where SmartBear comes in. Our tools help streamline your process, so you can release software at the speed your customers expect.

Manage | Analyze and improve all of your testing

Zephyr — Native Jira & enterprise test management

CrossBrowserTesting
Run Selenium & Appium tests in the cloud

TestComplete
Automated UI functional testing

LoadNinja
Automated UI performance testing

BitBar
Test mobile apps on real devices in the cloud

UI

CucumberStudio
Design features & tests using BDD

Design
Collaborate on user stories, tests, and code

SwaggerHub
Design, model & share API definitions

Commit
Commit and push new code and tests to kick off CI/CD

Test
Create, manage, and execute automated API and UI tests

API

ReadyAPI
Automated API testing - functional, security, performance and service virtualization

aws

Deploy
Deploy to production once tests and builds pass

Monitor
Monitor the performance of your APIs and web applications

AlertSite
Global, synthetic API monitoring

Collaborator   Code, document & artifact review

Review | Reduce defects and improve trust with peer code review

16M+ Users | **24K+** Companies | **194** Countries

SMARTBEAR

Over 16 million software professionals and 24,000 companies across 194 countries use SmartBear tools.
