SMARTBEAR
TestLeft

Finally a UI automation testing tool in your IDE that lets you test earlier than ever before

## The only UI automated testing tool that speaks to the techie in you

Login

Create Tests Faster in Your IDE with Our UI Object Spy

Generate application models for web or desktop applications in two clicks. Simply drag and drop objects to access built-in properties, methods, and classes in a single file.

Accelerate Your Shift Left Movement with BDD

Generate application models for web or desktop applications in two clicks. Simply drag and drop objects to access built-in properties, methods, and classes in a single file.

Test Early, Test Often within Your DevOps Ecosystem

TestLeft seamlessly embeds into your development environment and DevOps ecosystem. With hundreds of integrations, TestLeft fits perfectly with continuous integration process.

Trusted by developers and technical testers to accelerate testing cycles

TestLeft is great and is exactly what we need in a testing solution. TestLeft basically ntegrates everything we were previously doing into Visual Studio and is easy to use and also keeps the test code simple.

– Jonathan Meyer, Software Test Engineer at BioFire Diagnostics, LLC

## Broad technology support for continuous testing

IDEs

IJ · Visual Studio · eclipse

BDD Frameworks

Cucumber Supported by SMARTBEAR · jbehave · specflow

Software Development Lifecycle with SmartBear

Agile and DevOps have transformed the rate of software development. To keep up, teams must work and communicate in new ways – which is where SmartBear comes in. Our tools help streamline your process, so you can release software at the speed your customers expect.

Manage | Analyze and improve all of your testing

Zephyr — Native Jira & enterprise test management

CrossBrowserTesting
Run Selenium & Appium tests in the cloud

TestComplete
Automated UI functional testing

LoadNinja
Automated UI performance testing

UI

BitBar
Test mobile apps on real devices in the cloud

CucumberStudio
Design features & tests using BDD

Design
Collaborate on user stories, tests, and code

SwaggerHub
Design, model & share API definitions

Commit
Commit and push new code and tests to kick off CI/CD

Test
Create, manage, and execute automated API and UI tests

API

ReadyAPI
Automated API testing - functional, security, performance and service virtualization

aws

Deploy
Deploy to production once tests and builds pass

Monitor
Monitor the performance of your APIs and web applications

AlertSite
Global, synthetic API monitoring

Collaborator — Code, document & artifact review

Review | Reduce defects and improve trust with peer code review

16M+ Users | **24K+** Companies | **194** Countries

SMARTBEAR

Over 16 million software professionals and 24,000 companies across 194 countries use SmartBear tools.
