# SMARTBEAR
Zephyr Enterprise

Elevate your enterprise with a scalable test management solution

A robust test management solution with real-time Jira integration

Independent Solution That Is Stacked for Scale

Get enhanced control on every stage of your software release with a standalone solution (managed outside of the Atlassian ecosystem) that is stacked for scale, enabling horizontal scalability to support up to 10,000 concurrent logins.

Enhance Cross Project Management With Multi-Project, Multi-Jira

Connect and consolidate your data, and manage defects across multiple Jira systems, with just one Zephyr deployment. Keep project teams in sync on cross-project quality initiatives.

Empower Teams With End-to-end Visibility and Global Repositories

Get deeper visibility on your testing progress with interactive reports and customizable dashboards. Enable your teams to kick-off projects faster with a global test case repository shared across projects and releases.

We picked what we thought was the most mature product of all those we had evaluated. Zephyr offered the most features and functionality that were needed for our project team. It is very easy to use and straightforward.

– Jan Vriens, QA Manager, Acerta

Outside of the testers, it's also easier for other parties, like management or other stakeholders who need to look at the testing process. That's been very useful to our team.

– Idibek Biharmonic, Senior QA Analyst with Scivantage

Integrations
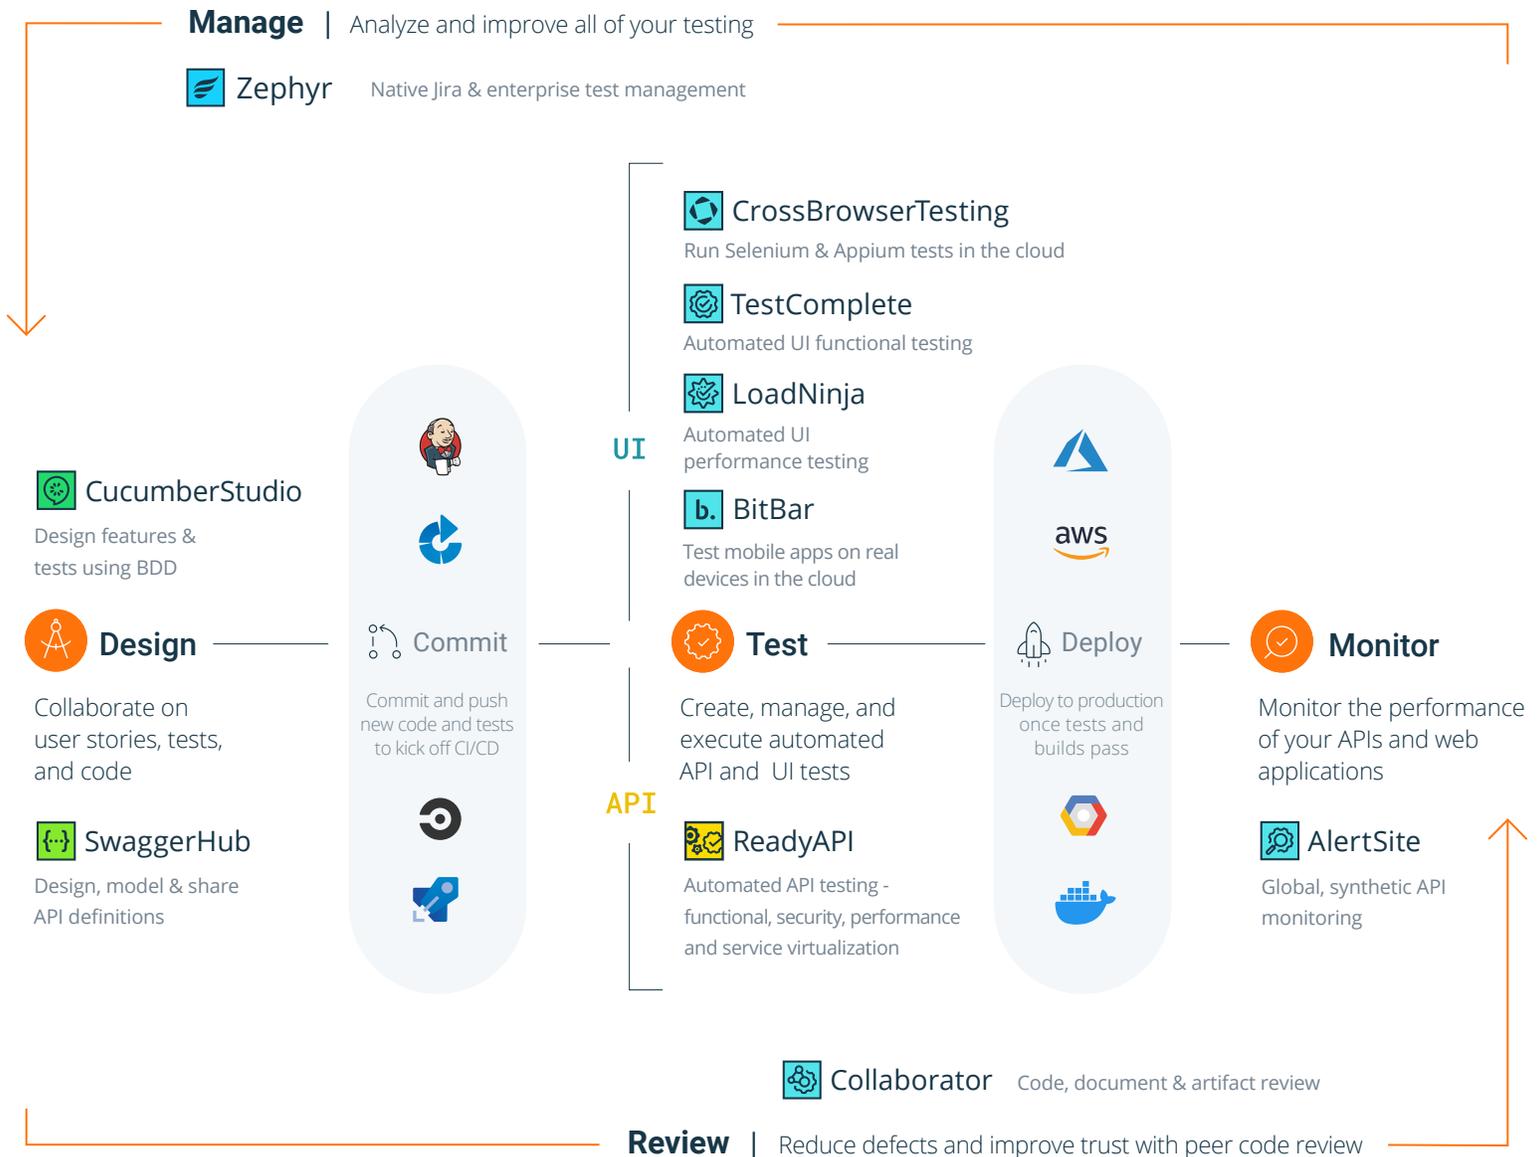

- Bamboo
- Jira Software
- HP Unified Functional Testing
- Selenium
- Confluence
- Jenkins

Innovators who trust Zephyr

- TOYOTA
- APPLIED MATERIALS
- Coca-Cola
- ORACLE
- HARRIS
- NCR

Software Development Lifecycle with SmartBear

Agile and DevOps have transformed the rate of software development. To keep up, teams must work and communicate in new ways – which is where SmartBear comes in. Our tools help streamline your process, so you can release software at the speed your customers expect.

Manage | Analyze and improve all of your testing

Zephyr   Native Jira & enterprise test management

CrossBrowserTesting
Run Selenium & Appium tests in the cloud

TestComplete
Automated UI functional testing

LoadNinja
Automated UI performance testing

BitBar
Test mobile apps on real devices in the cloud

CucumberStudio
Design features & tests using BDD

Design
Collaborate on user stories, tests, and code

SwaggerHub
Design, model & share API definitions

Commit
Commit and push new code and tests to kick off CI/CD

UI

API

Test
Create, manage, and execute automated API and UI tests

ReadyAPI
Automated API testing - functional, security, performance and service virtualization

Deploy
Deploy to production once tests and builds pass

Monitor
Monitor the performance of your APIs and web applications

AlertSite
Global, synthetic API monitoring

Collaborator   Code, document & artifact review

Review | Reduce defects and improve trust with peer code review

16M+ Users | **24K+** Companies | **194** Countries

SMARTBEAR

Over 16 million software professionals and 24,000 companies across 194 countries use SmartBear tools.
