

Multi User Premium License

Designed for SMBs, Managed Service Providers (MSPs), and Small Teams

- ✓ Multiple Seats
- ✓ 1 Session
- ✓ Unlimited Endpoints

Multi User Premium License Feature Highlights

- ✓ **Multiple seats**, so each user on your team gets a licensed TeamViewer account.
- ✓ **1 session** (aka channel), so at any given time, 1 of your licensed users can use the channel to open a remote session on a computer or mobile device and connect to up to 10 devices at the same time, in separate tabs, for productive multitasking.
- ✓ **Unlimited endpoints**, so you can remotely access, support, and control as many attended devices as needed (i.e., desktop computers, laptops, phones*, or tablets*). For attended access to laptops or desktops, support recipients simply run a QuickSupport module, then accept incoming connection requests to allow one-time remote support sessions. For attended access to mobile devices*, support recipients install the TeamViewer Quick Support app, then accept incoming connection requests to allow remote support.
- ✓ **300 managed devices**, so you can remotely access, support, and control unattended devices, such as servers, point of sale (POS) systems, digital signage, or kiosks. Unattended devices must have the TeamViewer Host app installed on them and do not require another person to accept an incoming remote connection request in order to start a session.
- ✓ **User access reporting**, so you can automatically log every outgoing connection made by licensed users for compliance, billing, auditing, and productivity purposes.

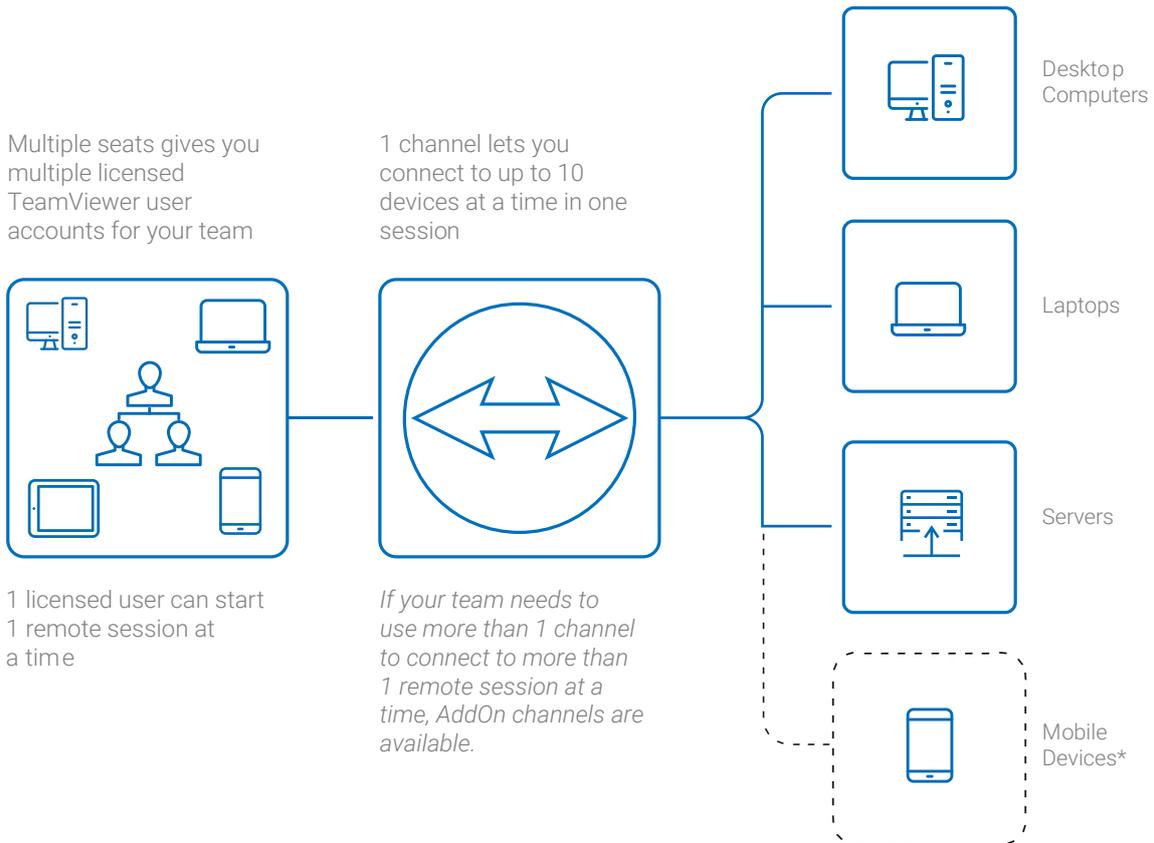

**Remote Connections to mobile devices from computers require the Mobile Device Support AddOn.*

How it works

When accessing or providing remote support for devices, there's no charge to you or your support recipients to establish incoming remote connections. That means you can use your TeamViewer licensed user accounts to remotely access and support an unlimited number of endpoints (computers, servers, or mobile devices*).

**Remote Connections to mobile devices from computers require the Mobile Device Support AddOn.*

TeamViewer Security

Your Security Is Our Top Priority

All remote sessions are secured by end-to-end encryption.

Learn more about security at our [Trust Center](#).

Available AddOns
