

Vyond for Enterprise

Vyond for Enterprise is a solution for large regional and global organizations which combines the best of making a video, managing user access and permissions and complying with your organization's security and brand guidelines into one simple-to-manage package.

WHITE-GLOVE SERVICE

Our customer support and customer success professionals are all service-oriented product experts committed to helping you achieve your goals.

These experts are available 18 hours a day via toll-free telephone, live chat, and email. We offer this support in English, Spanish, Italian, Portuguese, French, German, and Russian. We do not farm this function out to call centers.

Vyond for Enterprise offers an extra level of support:

- A designated Customer Success Manager as your main point-of-contact
- Vyond Accel: a customized training and onboarding custom tailored to your team's needs
- SLAs and prioritized response: guaranteed uptime and a priority queue

DATA PRIVACY AND INFORMATION SECURITY

Vyond is committed to delivering a highly secure video creation platform to our customers worldwide. To better protect our customers' personal and company data, we've implemented comprehensive security processes and controls.

Vyond is:

- ISO 27001 certified
- GDPR compliant
- Privacy Shield verified

Vyond for Enterprise

Advanced Security

Vyond for Enterprise includes the Vyond Secure Suite, a collection of enterprise security features designed to comply with the IT security standards of any company.

BRUTE FORCE LOGIN PROTECTION

Limit the number of login attempts before an account is locked.

INACTIVITY LOGOUT

Log users out after an administrator-defined amount of inactivity.

IP WHITELISTING

Ensure that your organization's Vyond account is only accessible through trusted connections. This prevents logins from any address that has not been specifically whitelisted.

CUSTOMIZABLE PASSWORD COMPLEXITY

Implement company-wide password requirements.

SINGLE SIGN ON

Integrate Vyond directly with your company's authentication service.

CUSTOM VIDEO CACHE EXPIRATION

Define how long data will remain cached.

OPTIONAL SECURITY FEATURES

Data segregation: secure your user data in its own separate database.

COMING SOON

ADMINISTRATIVE CONTROL

Managing a few users is easy. Managing user access and permissions for hundreds of users in different departments and geographies is much more difficult. Our Admin Control Suite provides powerful tools for the job.

- Create user groups with their own admins
- Segregate users into restricted groups
- Group users for more efficient video sharing
- Set group-level access to videos
- Set group-level video sharing permissions
- Assign users to groups and deactivate users
- Monitor user activity logs

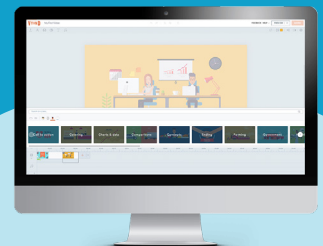

BRAND MANAGEMENT

The Brand Management Suite in Vyond Studio provides the tools to ensure that videos made by your users will comply with your organization's brand standards and guidelines.

- Create branded libraries and asset packs
- Restrict access to off-brand content
- Review and approve videos

TWO-FACTOR AUTHENTICATION

Require authentication when logging on.
